***Allowable Subject Matter***

While a baluster is well known in the art to comprise two sections: (1) a base section comprising a fastener-accommodating hole with a fastener and (2) a central section having one end connected to the base section and the other end connected to a distal section, prior art fails to further disclose a distal section comprising a first and second end, a bore defined in the first end of the distal section and a connecting element attached to the second end of the distal section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
